

HAF®

VITAMIN

Multivitamin complex that will fill our plants with energy and vitality to reach their maximum potential.

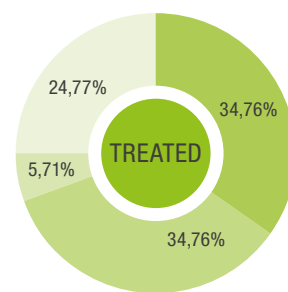

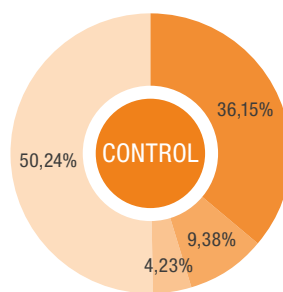

Haf[®] VITAMIN it's an exclusive vitamin concentrate specifically formulated to achieve an energetic and complete stimulation of the crop.

Give your crop extra energy and vitality to improve its growth and vigor in general, as well as its sprouting and recovery capacity in particular. Its use in the first stages of the plant (seedlings, seedlings and transplants) stimulates vigorous growth in a natural and balanced way. Furthermore, its continued use energizes and enhances all the metabolic functions of the plant throughout its cycle.

TRIAL

The product is designed to activate dormant buds (which then become swollen buds), or at that point to make the bud come out (sprouted bud) and begin to grow (grown bud). Once grown, the shoot length reveals the degree of development of the plant.

	CONTROL	TREATED
 Swollen bud	36,15%	34,76%
 Sprouting bud	9,38%	34,76%
 Grown bud	4,23%	5,71%
 Dormant bud	50,24%	24,77%

BENEFITS

- ✓ Contains 7 vitamins which, among others:
 - Speed up metabolism
 - Offer antioxidants
 - Provide key substances for essential plant functions
 - Provide coenzyme cofactors
- ✓ Reduces transplantation impact
- ✓ Facilitates energy consumption and storage
- ✓ In nurseries, more cycles throughout the year, therefore, larger production and greater profits
- ✓ Effective at the early stages of plants, seeds, and saplings
- ✓ Promotes vegetative growth
- ✓ Restores plant vigour
- ✓ Promotes chemical balance
